Attempt : 1
Total Mark : 10
Marks Obtained : 10

Section 1 : Coding

1. Problem Statement

Monica is interested in finding a treasure but the key to opening is to get the sum of the main diagonal elements and secondary diagonal elements.

Write a program to help Monica find the diagonal sum of a square 2D array.

Note: The main diagonal of the array consists of the elements traversing from the top-left corner to the bottom-right corner. The secondary diagonal includes elements from the top-right corner to the bottom-left corner.

Input Format

The first line of input consists of an integer N, representing the number of rows and columns.

The following N lines consist of N space-separated integers, representing the 2D array elements.

Output Format

The first line of output prints "Sum of the main diagonal: " followed by an integer, representing the sum of the main diagonal.

The second line prints "Sum of the secondary diagonal: " followed by an integer, representing the sum of the secondary diagonal.

Refer to the sample output for formatting specifications.

Sample Test Case

Input: 3
1 2 3
4 5 6
7 8 9

Output: Sum of the main diagonal: 15
Sum of the secondary diagonal: 15

Answer

```
// You are using Java
import java.util.Scanner;
import java.util.Arrays;

public class Main{
   public static void main(String[] args){
      Scanner sc = new Scanner(System.in);
      int n = sc.nextInt();
      int[][] mat = new int[n][n];
      for(int i=0;i<n;i++){
         for(int j=0;j<n;j++){
            mat[i][j] = sc.nextInt();
         }
      }
      int sm = 0;
      int ss = 0;
      for(int k=0;k<n;k++){
         sm += mat[k][k];
```

```
            ss += mat[k][n-1-k];
        }
        System.out.printf("Sum of the main diagonal: %d\n",sm);
        System.out.printf("Sum of the secondary diagonal: %d",ss);
    }
}
```

Status : Correct ***Marks : 10/10***
